GENERAL NOTES

The statistics presented in this publication are compiled from information submitted to the Department of Hospitals and Medical Care by each general hospital, auxiliary hospital and nursing home.

Hospital operation and financial data, shown in Tables 1 to 12, are derived from the **Annual Return of Health Care Facilities – Hospitals – Part One and Two** for the year ended March 31, 1987. The data include all amendments and corrections submitted to the Department by individual hospitals on or before June 29, 1988. The financial data presented in Tables 10 to 12 are compiled and reported on an accrual basis. Tables 10, 11 and 12 contain audited operating expense data as certified and reported by the external auditor of the hospital. When interpreting the above data, reference should be made to the Glossary which contains selected definitions of terms used in the Annual Return.

Nursing home operation and patient data, shown in Tables 13 and 14, are derived from the **Annual Return of Nursing Homes** for the fiscal year 1986-87 and include all amendments and corrections submitted to the Department by individual nursing homes on or before Sept. 8, 1988. The exception to this is column 1 of Table 13 which is obtained from the nursing home contracts.

The statistical tables which follow provide detailed information on the operation and utilization of hospitals and nursing homes. In these tables, the facilities have been arranged in ascending order of approved bed complement within each facility group. An alphabetical listing for each type of facility can be found at the end of the supplement.

Note: All rates shown in the following tables have been rounded to one decimal place.

Auxiliary Hospital:

A hospital designed and operated for persons who require elements of hospital care at a less intensive level than are provided in general hospitals. The patients are usually chronically ill or disabled. For some, treatment consists of rehabilitation to a point that return to the community or transfer to a nursing home or other residential facility is possible. For others, treatment is the provision of necessary skilled nursing and medical care for an extended period of time, even though there is little prospect of rehabilitation.

The average number of in-patients during any given period of time. It is calculated by dividing the number of patient-days during the period, by the number of days in the period.

Average Length of Stay:

The average number of days stay of in-patients who were separated from the facility during the reporting year. It is calculated by dividing the total days stay by the number of separations during the reporting year.

Average Percentage Occupancy:

The ratio of actual days of care to the maximum days of care for the reporting year, expressed as a percentage. It is computed by dividing the total patient-days during the reporting year by the total bed days in the same year (approved complement at March 31 of the reporting year times the number of days in the year) and multiplying by 100.

Bassinets Staffed and in Operation:

The number of bassinets that are actually available for patient accommodation, with staff available to provide the required level and type of care, whether or not actually occupied by a patient at that time.

Discharge:

The official departure from the hospital or from a provincially-recognized unit of the hospital of a live in-patient.

Provides primarily for the diagnosis and short-term treatment of patients for a wide range of diseases or injuries.

In Hospital at Beginning of the Year:

Is the count of all in-patients who were assigned a hospital bed or bassinet as at 12:01 a.m. on the first day of the reporting year. Includes any in-patient who was temporarily visiting out of hospital on this date, but who had not been discharged.

In Hospital at End of the Year:

Is the count of all in-patients registered in the hospital at 12:00 p.m. on the last day of the reporting year and includes patients temporarily out of hospital but who have not been discharged.

In-Patient:

Is a person who has been admitted to a hospital for medical and hospital services and who has been assigned an in-patient bed, or bassinets. This category excludes stillbirths, as well as patients attending a day or night care unit.

In-Patient Admission:

Is the official acceptance into a hospital of a patient (including an infant born alive in the hospital) who requires medical and hospital services including room and board. Reception involves the allocation of a hospital bed, bassinets or an incubator to the patient. A person is counted as an admission each time he is formally admitted to the hospital or to a provincially-recognized unit within the hospital.
